The Bearcast Media *Editor Handbook*

How to log in, write, edit and publish on bearcastmedia.com — field by field, for every department. Rewritten for the current Studio and website, including the things that now happen automatically.

VERSION 2.0 · SUPERSEDES V1.1 (AUG 2026)

FOR

All Bearcast editors
Radio · Sports · BTV · Journalism · Music · Team

MAINTAINED BY

Cam Garrison
Web Director

LAST UPDATED

October 2026
© 2026 Bearcast Media

What's in this Handbook

§ 01	Read This First	3
§ 02	Getting Into Sanity	4
§ 03	A Tour of the Studio	6
§ 04	The Core Skills	8
§ 05	For the Journalism Desk	11
§ 06	For the Sports Desk	14
§ 07	For the Music Desk	16
§ 08	For BTV (Television)	18
§ 09	For the Radio Desk	20
§ 10	Managing People & Directors	23
§ 11	GBM Meetings & Applications	25
§ 12	Site Settings	27
§ 13	Things to Never Do	28
§ 14	When Something Looks Broken	29
§ 15	Glossary & Quick Reference	30

> WHAT'S NEW IN THIS EDITION
>
> BTV videos now appear automatically from YouTube · stories can be read aloud, saved and searched across the whole archive · links you share show a real preview · song requests and Join applications arrive in Slack · the Team page orders directors by their titles · the Departments menu is gone · plus "Under the hood" boxes that show the actual rule the Studio checks, for the curious.

§ 01 — START HERE

Read This First

> *You don't need to be technical. If you can fill out a form online, you can publish to bearcastmedia.com. This handbook tells you which buttons to press, in order, for everything your department creates.*

1.1 What Sanity is, in one paragraph

Sanity is where every piece of content on bearcastmedia.com is written and edited. Think of it like Google Docs for the website — except instead of saving documents to a folder, you fill out forms that the website displays as articles, reviews, schedules and director bios. Our editing app is called the **Studio**. When you press **"Publish"**, the change reaches the public site within about a minute.

1.2 How to use this handbook

- Read §1–§4 once. Then jump to your department (§5–§11) and use it as a reference.
- **Recipes** are the numbered steps with red circles — follow them in order.
- Fields marked REQUIRED must be filled before Sanity lets you publish.
- **Under the hood** boxes show the actual rule the Studio checks. You can skip them.
- When in doubt, don't publish. Your work is saved as a draft; ask the Web Director.

1.3 The two most important buttons

- **"Publish"** — puts your changes on bearcastmedia.com.
- **"Discard changes"** — throws away unpublished edits and goes back to the published version.

> TIP
>
> Sanity saves as you type, so you almost never lose work. But saving is not publishing — until you press **"Publish"**, your change is a draft only editors can see. The website is built to **never** show drafts.

1.4 If you only remember four things

1. Log in at **bearcast.sanity.studio**.
2. Find your department in the left-hand menu.
3. Press **"+"** to create, or click an existing item to edit.
4. Fill out the fields, then press **"Publish"**.

§ 02 — ACCESS

Getting Into Sanity

2.1 The address

The Studio lives at **https://bearcast.sanity.studio**. Bookmark it — it's the only place you edit the website. There is no "/wp-admin" or "/admin" on bearcastmedia.com.

2.2 Getting an account

Accounts are issued by the Web Director, who invites you as a member of the Bearcast project (role **Editor**). Send the Web Director a Slack message with:

- the email you want to use — your UC email (`@mail.uc.edu`) or a personal Gmail;
- your department (Radio / Sports / BTV / Journalism / Music);
- your role (director, contributor, reviewer…).

2.3 Recipe: logging in for the first time

1. Open the invitation email from Sanity and press **"Accept invite"**.
2. Choose how to sign in — the option that matches the email you gave (Google for Gmail; the matching provider for your UC email).
3. Allow Sanity to use your account (a one-time prompt).
4. Choose **Bearcast Media** if you see a list of projects.
5. The Studio opens with the department menu on the left. Bookmark it.

2.4 Recipe: logging in later

1. Go to bearcast.sanity.studio.
2. Choose the **same** sign-in method as the first time.
3. You're in — the Studio remembers where you were.

> IMPORTANT
>
> Always use the same sign-in method. Signing in with UC one day and Gmail the next creates a second, separate account with no permissions. If that happens, message the Web Director. Password resets go through Sanity's reset flow (or your Google account) using the same email.

> KEEP YOUR ACCOUNT SAFE
>
> Your account can publish to the whole internet. Turn on two-step verification for the Google or UC account you sign in with, never share your login, and sign out on shared computers. If you think someone else used your account, tell the Web Director immediately.

§ 03 — INTERFACE

A Tour of the Studio

> *The Studio is organized in columns that open left to right. Once the column system clicks, the rest makes sense.*

3.1 The left-hand menu

The menu is arranged by department, not by type of content. This is the complete menu:

```
⚙  Site Settings
──────────────
📰 Journalism
     All Articles · Featured · Breaking
     Desk: News · Campus Life · Opinion · Investigation
           Culture · Science & Tech · Politics
🎵 Music
     Reviews · Music Journalism
🏀 Sports
     Game Coverage · Sports Journalism
📺 BTV            (episodes, newest first)
📻 Radio          (Shows & Schedule, A-Z)
──────────────
👥 People
     All People · Directors · Executive Leadership
📅 GBM Meetings   (by date)
```

The old **Departments** item has been removed — departments are built into the website.

UNDER THE HOOD

Each sub-list is the same kind of document with a filter. “Featured” is just every article where Featured is ticked:

BEARCAST-STUDIO/STRUCTURE.TS · LINES 88-90

```
88  .title('Featured Articles')
89  .filter('_type == "article" && featured == true')
90  .defaultOrdering(ORDER_NEWEST_PUBLISHED),
```

3.2 Column 2 and Column 3

Click a menu item and the next column shows what’s inside (for Journalism: All Articles, Featured, Breaking and the desks). Click one of those to see the list of items, newest first. Click an item to open it in the editor.

3.3 The top bar

- **Bearcast Media** (top left) — back to the start.
- **“+”** — create something new. (Site Settings never appears here; there is only one.)
- **Search** — find any document in the Studio.
- Your profile picture — sign out.

3.4 The editor

Each item opens as a form. Longer forms are split into tabs (for an article: Content, Metadata, Media). The action bar sits at the bottom: **“Publish”**, and a ⋯ menu with Unpublish, Duplicate, Delete and History.

3.5 Status labels

Published	The website shows exactly what you see.
Edited / unpublished changes	You changed something; the website still shows the last published version.
Draft / not published	Brand new; never been live.

§ 04 — UNIVERSAL SKILLS

The Core Skills

> *Almost everything you'll do is one of these eight skills. Learn them once; the department chapters are then quick reference.*

4.1 Creating a new item

1. Click your department, then the list you want (e.g. **All Articles**).
2. Press **"+"** at the top of the list.
3. Fill the fields top to bottom. Red warnings tell you what's missing or wrong.
4. Press **"Publish"**.

4.2 Editing an existing item

1. Find it in its list (or use Search) and click it.
2. Change what needs changing.
3. Press **"Publish"**. The site updates within about a minute.

4.3 Uploading an image

1. Click the image field (e.g. **Cover Image**) and choose a file, or drag one in.
2. Fill in **Alt text**: a plain description of what the image shows, for people using screen readers and for search engines. Example: "Cover of Em Beihold's EP, a black-and-white portrait." Not "image" or "cover".
3. Open the crop tool and drag the circle (the **hotspot**) onto the most important part — usually a face.

> THE HOTSPOT MATTERS MORE THAN EVER
>
> The website crops the same photo into squares for cards, circles for director profiles and a wide 1200×630 rectangle for link previews in iMessage, Instagram, Slack and X. All of those keep the hotspot in frame. A good hotspot means nobody's head gets cut off anywhere.

4.4 Writing with the rich-text editor

Body fields (article, review, recap) work like Google Docs: type paragraphs, select text and use the toolbar, choose a style from the dropdown, add lists, links, images and pull quotes.

STYLE / FORMAT	USE IT FOR
Normal	Most of your writing.
Heading 2 / 3 / 4	Section breaks in long pieces (H2 major, H3 inside H2, H4 rarely).

STYLE / FORMAT	USE IT FOR
Blockquote	A quoted passage from a source.
Bold · Italic	Strong emphasis (sparingly) · titles of works, light emphasis.
Underline · Strikethrough · Code	Rarely · corrections · technical names.
Bulleted / numbered list	Lists.
Link (chain icon)	A web address; tick “Open in new tab” for outside sites.
+ Image	A photo inside the story — alt text required, caption optional.
+ Pull Quote	A highlighted quote with attribution, shown large in the story.

UNDER THE HOOD

Links must start with http, https, mailto or tel (or be a link within the site). Anything else is refused, which is why a pasted `javascript:` link won’t save:

BEARCAST-STUDIO/SCHEMAS/OBJECTS/RICHBODY.TS · LINES 60-66

```
60  validation: (r: any) =>
61    r
62      .required()
63      .uri({
64        scheme: ['http', 'https', 'mailto', 'tel'],
65        allowRelative: true,
66      }),
```

4.5 Linking a person (author, host, reviewer)

People are linked, not typed, so a name or bio change happens once and updates everywhere.

1. Click the **Author** (or Reporter / Reviewer / Hosts) field.
2. Start typing the name and choose the right person.
3. Not in the list? Add them first (§10), then come back.

4.6 The URL slug

Every article, review and recap has a **URL Slug** — the part of the web address that identifies it, e.g. `bearcastmedia.com/journalism?article=margs-mexican-food-and-music`. Press **“Generate”** to make it from the headline (lowercase, dashes, no accents).

> DON’T CHANGE A SLUG AFTER PUBLISHING
>
> Links people have shared use the slug. If you change it, those links stop finding the story. Fix a typo in the *headline* instead — the slug can stay as it is.

4.7 Publishing and unpublishing

1. Clear every red warning.
2. Press **“Publish”**. The status changes to Published; the site follows within about a minute.

To take something down: open it, ⋯ menu → **“Unpublish”**. It disappears from the site but stays in the Studio as a draft.

> UNPUBLISH, DON’T DELETE
>
> Delete removes the item from Sanity entirely. If you’re unsure, always unpublish first. (A weekly backup exists, but restoring it is a job for the Web Director.)

4.8 Checking your work on the live site

- **Search**: on any page press **Ctrl K** (Windows) or **⌘ K** (Mac), or the Search button, and type your headline. Search covers the whole archive, including words inside stories, and forgives typos.
- **Share link**: with your story open on the site, the address bar holds a direct link. Paste it in Slack or iMessage — you’ll see a preview with your headline, summary and cover photo.
- **Listen**: every story has a 🎧 Listen button that reads it aloud — a quick way to catch awkward sentences.

§ 05 — JOURNALISM DESK

For the Journalism Desk

> *Every written article uses one form. The Desk field decides which page it appears on — including music journalism and sports journalism.*

5.1 The article form, field by field

CONTENT TAB

Headline REQUIRED · MAX 180

The title. Aim for under 80 characters so cards look clean.

e.g. "ChatGPT and its consequences: How educators are navigating AI in academia"

Deck (subtitle) OPTIONAL · MAX 300

One or two sentences under the headline that set up the story.

Article Body RICH TEXT

The story itself (§4.4).

METADATA TAB

Desk REQUIRED · LIST

News · Campus Life · Opinion · Investigation · Culture · Science & Tech · Politics → **Journalism page**. Music (journalism) → **Music page**. Sports (journalism) → **Sports page**.

URL Slug REQUIRED

Press Generate (§4.6). Don't change it once published.

Excerpt (card preview) OPTIONAL · MAX 500

The summary on cards, in search results and in link previews. If empty, the deck is used.

Category / Tag (within desk) OPTIONAL · MAX 60

A short label like "Profile", "Essay", "Analysis", "Interview". Shown on the story and used to suggest related reading.

Author REQUIRED · PERSON

The writer (§4.5).

Published Date REQUIRED

Fills in automatically. Lists are sorted by it, newest first.

Featured Article ON/OFF

Pins the story to the top of its page.

Breaking News ON/OFF

Shows a red “Breaking” tag on the story.

Tags UP TO 20 · EACH MAX 40

Keywords. Good tags improve search and the “Keep reading” suggestions.

MEDIA TAB

Cover Image OPTIONAL · ALT TEXT REQUIRED IF USED

The photo for cards, the story header and link previews. Optional caption (max 500). Set the hotspot!

Card Emoji (fallback) OPTIONAL · ONE EMOJI

Shown if there’s no cover image. One emoji only — symbols like `< > / &` are refused.

5.2 Recipe: publishing an article

1. Journalism → **All Articles** → **“+”**.
2. Content tab: Headline, Deck, Body.
3. Metadata tab: Desk, press Generate for the slug, Author, Excerpt, Category, Tags.
4. Media tab: Cover Image with alt text and hotspot.
5. **“Publish”**. Check it on the site with Ctrl/⌘ K.

5.3 Recipe: featuring or flagging breaking news

1. Open the article → Metadata tab.
2. Turn on **Featured Article** and/or **Breaking News**, then **“Publish”**.
3. When the moment passes, turn them off again and publish.

5.4 Recipe: correcting a published article

1. Open it, fix the text (headline, body — not the slug).
2. For a factual correction, add a short italic note at the end of the body: *“Correction: an earlier version of this story…”*
3. **“Publish”**.

5.5 Recipe: moving a story to another page

Change its **Desk** (e.g. News → Sports (journalism)) and publish. Old shared links keep working: if someone opens a link on the wrong page, the site finds where the story lives now and takes them there.

5.6 Where each desk shows up

DESK	PAGE	STUDIO LIST
News, Campus Life, Opinion, Investigation, Culture, Science & Tech, Politics	Journalism (*The Bearcast*)	Journalism → Desk: …
Music (journalism)	Music	Music → Music Journalism
Sports (journalism)	Sports	Sports → Sports Journalism

5.7 What readers can do with your story

- 🎧 **Listen** — read aloud by their device.
- 🔖 **Save** — keep it on a reading list in their browser.
- **Keep reading** — three suggestions: more from the same writer, same category, shared tags and similar headlines.
- **← / →** — flip to the next story; reading time is calculated automatically (about 220 words a minute).

§ 06 — SPORTS DESK

For the Sports Desk

> *Game recaps use the Game Coverage form, which adds a scoreboard. Everything else — picks, rankings, columns, previews — is an article on the Sports (journalism) desk.*

6.1 The Game Coverage form

GAME INFO TAB

Sport REQUIRED · LIST

Football · Basketball · Baseball · Soccer · Hockey · Tennis · Volleyball · Other. Drives the sport filter and search shortcuts like “Sports · Basketball”.

Matchup REQUIRED · MAX 120

e.g. “Bearcats vs. Tigers”

Final Score OPTIONAL · FORMAT

Bearcats’ score first. Allowed: `28-21`, `28-21`, `2-1 (OT)`.

Venue HOME / AWAY / NEUTRAL

Shown on the scoreboard.

Game Date OPTIONAL

Stored for the record; the site currently shows the published date.

CONTENT TAB

Story Headline REQUIRED · MAX 180

e.g. “Bears Defense Stifles Tigers in Season Opener”

Recap RICH TEXT

The story.

METADATA & MEDIA TABS

URL Slug (required), Excerpt (500), Reporter (required), Published (required), Featured, Cover Image (alt text up to 300), Card Emoji — same as articles.

UNDER THE HOOD — THE SCORE RULE

BEARCAST-STUDIO/SCHEMAS/DOCUMENTS/COVERAGE.TS · LINE 83

```
83  r.max(40).regex(/^\d{1,3}\s*[-\-]\s*\d{1,3}(\s*\([^<>"']{1,16}\))?$/, {
```

6.2 Recipe: publishing a game recap

1. Sports → **Game Coverage** → **“+”**.
2. Game Info: Sport, Matchup, Final Score, Venue.
3. Content: Headline, Recap. Metadata: Generate slug, Reporter, Excerpt.
4. Media: cover photo with alt text and hotspot. **“Publish”**.

6.3 Coverage or Sports Journalism?

USE GAME COVERAGE FOR	USE AN ARTICLE (SPORTS JOURNALISM DESK) FOR
A recap of one specific game with a final score	Weekly picks, power rankings, mock drafts, season previews and outlooks, columns, profiles, staff news

This is the rule the October 2026 clean-up applied to the archive: 66 non-game pieces moved to Sports Journalism and 184 game pieces stayed as coverage.

The Sports page’s **Follow** button links to the Sports desk’s X account, set in Site Settings (§12).

§ 07 — MUSIC DESK

For the Music Desk

> *Album and track reviews use the Music Review form, with a score and verdict. Interviews, live recaps, playlists, galleries and features are articles on the Music (journalism) desk.*

7.1 The Music Review form

Review Headline REQUIRED · MAX 180

e.g. "Chappell Roan Writes the Album of the Year"

Album / Track Title REQUIRED · MAX 200

The real title of the release — not your headline. Cards show "Album — Artist".

Artist REQUIRED · MAX 120

The real artist name (it powers search and link previews).

Release Year 1900-2100

Genre REQUIRED · MAX 40

Becomes a filter pill and a search shortcut, so reuse existing spellings: Pop, Indie, R&B, Hip-Hop, Alternative, Rock, Folk, K-Pop, Jazz… Capitalization doesn't matter; spelling does.

Score (out of 10) 0-10 · RATING TAB

Shown as stars: half the score, rounded.

One-Line Verdict ESSENTIAL · GREAT · GOOD · MIXED

Colours the verdict badge.

Excerpt MAX 500

One or two sentences for the card and link previews.

Album Cover Art OPTIONAL · ALT TEXT

Square artwork works best.

Reviewer, Published Date, Featured, URL Slug, Card Emoji, Review Body AS FOR ARTICLES

SCORE	0-1	2-3	4-5	6-7	8-9	10
Stars shown	★ (minimum 1)	★ / ★★	★★ / ★★★	★★★ / ★★★★	★★★★ / ★★★★★	★★★★★

Exactly: stars = score ÷ 2, rounded (7 → 4 stars; 5 → 3 stars), never below one.

7.2 Recipe: publishing a review

1. Music → **Reviews** → **“+”**.
2. Content: Headline, Album, Artist, Body. Rating: Score, Verdict.
3. Metadata: Generate slug, Genre, Year, Reviewer, Excerpt. Media: Cover Art.
4. **“Publish”**.

7.3 Review or Music Journalism?

If it judges a specific album or track, it’s a review. Everything else — interviews, live show recaps, playlists, photo galleries, “Tips & Tricks”, Queen City Sessions write-ups, news — is an article with Desk = Music (journalism) and a Category such as Interview, Gallery or Playlist. (In October 2026, 110 such pieces were moved out of Reviews; 94 real reviews remain.)

7.4 Music Videos

The Music page’s **Music Videos** shelf fills itself from the BTV YouTube channel: videos with “Queen City Sessions”, “Mini City Session”, “music video”, “live performance” or “acoustic” in the title appear there automatically (§8).

§ 08 — BTV

For BTV (Television)

> *Good news: you usually don't need the Studio at all. Every video uploaded to youtube.com/@BearcastMedia appears on the BTV page automatically, with its YouTube title, description, thumbnail and live view count.*

8.1 How videos get onto the site

1. Upload to the Bearcast Media YouTube channel as usual (make it Public).
2. Within about 15 minutes it appears on bearcastmedia.com/btv, in search, and — if the title mentions a session or music video — on the Music page. It's marked **NEW** for 14 days.

The site guesses a show type from the title: "vs." or a sport name → Game Broadcast; "Queen City Sessions" / "Mini City Session" → music session; "news" or "report" → News; otherwise a BTV show. Clear titles help.

> OLDER VIDEOS
>
> Without extra setup, YouTube's public feed only lists the newest 15 videos. The Web Director can add a YouTube API key in Cloudflare to show the full back catalogue (up to 200).

8.2 When to create a BTV episode in the Studio

Only when you want to add something YouTube can't: a show name, a show type, season and episode numbers, a longer description, a runtime, or the **Featured** spot at the top of the BTV page. The episode is matched to the video by its YouTube ID, and the Studio's values win.

8.3 The BTV Episode form

Episode Title REQUIRED · MAX 180

Replaces the YouTube title on the site.

Show Type REQUIRED · LIST

BTV Show · Documentary · Music · Sports · News · Special. Drives the channel filter.

Show Name MAX 120

e.g. "The BTV Show", "Sports Wrap"

Season / Episode Number 1-99 / 1-999

Shown as S01 E04.

YouTube Video ID REQUIRED · EXACTLY 11 CHARACTERS

Just the ID, never the full URL (see below).

Description MAX 2,000

Runtime MM:SS OR H:MM:SS

e.g. 28:14 or 1:02:30 — filled from YouTube automatically when the API key is set.

Air Date REQUIRED

Featured Episode ON/OFF

The hero player at the top of BTV.

Mark as New ON/OFF

Forces the NEW badge (otherwise automatic for 14 days).

8.4 Recipe: finding a YouTube ID

1. Open the video on YouTube and copy the address.
2. For `youtube.com/watch?v=dQw4w9WgXcQ` the ID is the 11 characters after `v=`. For `youtu.be/dQw4w9WgXcQ` it's the part after the slash.
3. Paste only those 11 characters.

UNDER THE HOOD

Anything that isn't exactly 11 letters, digits, dashes or underscores is refused — the ID goes straight into the video player's address:

BEARCAST-STUDIO/SCHEMAS/DOCUMENTS/EPISODE.TS · LINES 72-75

```
72  r.required().regex(/^[A-Za-z0-9_-]{11}$/, {
73    name: 'YouTube ID (11 chars, letters/digits/_/-)',
74    invert: false,
75  }),
```

8.5 Recipe: featuring an episode

1. BTV → **"+"** (or open the existing episode).
2. Title, Show Type, YouTube ID, Air Date; turn on **Featured Episode**.
3. **"Publish"**. Turn Featured off on the previous one.

§ 09 — RADIO

For the Radio Desk

> *Radio shows in the Studio are the single source of the schedule: the Radio page's weekly grid and show cards, the homepage "Now On Air" widget, and the line the player shows while a DJ is live.*

9.1 The Radio Show form

IDENTITY TAB

Show Name REQUIRED · MAX 120

Tagline MAX 200

One line shown in the grid and on the show card.

Hosts PEOPLE · UP TO 20

Link each DJ's person document.

Host(s) Display Name MAX 200

Optional override: "Rotating DJs", "Automated", or a custom string. Otherwise the linked names are joined with "&".

Genre / Category REQUIRED · LIST

Music · News · Sports · Talk · Live Performance. Colours the schedule tag and drives the Our Shows filter.

SCHEDULE TAB

Weekly Time Slots AT LEAST ONE

One entry per day the show airs: **Day**, **Start Time** and **End Time** in 24-hour format (`06:00` , `14:30` , `22:00`). A Mon–Fri show needs five slots. Overnight shows are allowed (22:00 → 02:00). The same day and start time can't appear twice, and start can't equal end.

ABOUT TAB

Full Description MAX 2,000

Shown in the show's details pop-up.

Cover Image ALT TEXT REQUIRED

Show Emoji ONE EMOJI

Accent Color HEX

e.g. `#FF6B35` (3, 6 or 8 hex digits after #). Tints the show's card and schedule row.

Featured Show ON/OFF

Highlights the show in the Our Shows spotlight.

SAY IT AS	TYPE IT AS	SAY IT AS	TYPE IT AS
6:00 AM	`06:00`	12:00 noon	`12:00`
9:30 AM	`09:30`	7:00 PM	`19:00`
Midnight	`00:00`	10:30 PM	`22:30`

UNDER THE HOOD

BEARCAST-STUDIO/SCHEMAS/OBJECTS/TIMESLOT.TS · LINES 70-77

```
70  .custom((endTime, context: any) => {
71    const startTime = context?.parent?.startTime
72    if (!startTime || !endTime) return true // other validators handle this
73    if (startTime === endTime) {
74      return 'End time must differ from start time (zero-length show).'
75    }
76    return true
77  }),
```

9.2 Recipes

Adding a new show

1. Radio → **“+”**.
2. Identity: Name, Tagline, Hosts, Genre.
3. Schedule: add a time slot for each day (24-hour times).
4. About: description, cover, accent colour. **“Publish”**.

Moving a show to a different time

1. Open the show → Schedule tab.
2. Edit the slot’s day or times (don’t add a duplicate). **“Publish”**.

Taking a show off the schedule

For a semester break, remove its time slots — but a show needs at least one, so for a permanent end, **“Unpublish”** the show instead of deleting it.

9.3 Now On Air and live DJ sets

The site works out what’s on from the visitor’s clock and your time slots. When a DJ goes live, Radio.co often stops sending song names, so the player shows **“🎙 [Show name] with [hosts]”** from the schedule instead of a stale song. If the schedule is wrong, that line is wrong — keep slots current.

9.4 Song requests and shout-outs

Listeners request songs from the Radio page. Each request arrives in the station's song-request **Slack channel** with the song, an optional name and message — and, if the listener opted in, their **Your Bearcast tier** (e.g. "⭐ Superfan"), marked *self-reported*: a fun cue for a shout-out, not proof. When a requested song airs, the listener's page celebrates and awards a "Called It" badge. The page also shows a live listener count ("12 listening now · Today's peak: 23").

§ 10 — PEOPLE

Managing People & Directors

> *There is one person document per human. The same document is the byline on articles, the host on radio shows and the card on the Team page.*

10.1 The Person form

Full Name REQUIRED · MAX 120

Pronouns OPTIONAL · MAX 40

e.g. she/her, they/them — shown on the profile.

Photo ALT TEXT

Set the hotspot on the face — the Team page crops to a circle around it.

Role / Title MAX 120

The job title. It also sets the order on the Team page — see below.

Department LIST

Executive · Radio · BTV · Journalism · Music · Sports.

Is a Director ON/OFF

Shows this person on the Team page.

Term DIRECTORS ONLY · MAX 20

e.g. 2026–2027

Is Executive Leadership DIRECTORS ONLY

Places them in the executive board at the top.

Bio MAX 1,500

Tags / Skills UP TO 20

Accent Color HEX, OPTIONAL

> KEEP IT PUBLIC-SAFE
>
> Everything in a published person document can be read by anyone — there is no private field. Never add phone numbers, student IDs or personal emails anywhere in Sanity.

10.2 How the Team page orders directors

Executive board first; then departments in the order Radio, BTV, Journalism, Music, Sports; then by position, read from the **Role / Title**:

RANK	TITLES CONTAINING…
1	General Manager, Station Manager, President, Editor-in-Chief, Executive Director
2	Vice President, Deputy, Managing Editor, Managing Director
2½	the department's own head, e.g. "Radio Director" in Radio
3	Director, Editor, Head, Chief
4	Manager, Coordinator, Lead
5	anything else
6	Assistant, Associate

Ties are alphabetical. So "Assistant Music Director" sorts after "Music Director" automatically — just write clear titles. Each director's profile pop-up also lists the shows they host and how many stories they've written, automatically.

10.3 Recipes

Adding a new person

1. People → All People → **"+"**.
2. Name, photo (with hotspot), role, department, bio.
3. Tick **Is a Director** if they lead; add Term and Executive if relevant. **"Publish"**.

End-of-term director handoff

1. Open the outgoing director → untick **Is a Director** → **"Publish"**. (Don't delete — their bylines stay attached.)
2. Open or create the incoming director, tick **Is a Director**, set Role, Term and photo → **"Publish"**.
3. Update radio show Hosts if a DJ changed.
4. Ask the Web Director to remove Studio access for anyone leaving.

§ 11 — RECRUITING

GBM Meetings & Applications

11.1 The GBM form

Meeting Date REQUIRED

GBMs are every other Thursday. Picking another weekday shows a yellow warning you can override for a one-off meeting.

Time FREE TEXT · MAX 40

“6:30 PM”, “7 PM” or “19:00” all work. Blank = 6:30 PM.

Location MAX 200

Building and room, e.g. “Emery 3225”. Blank = Emery 3225. The Join page uses the next meeting’s location everywhere it says where GBMs are held.

Topic / Agenda MAX 500

Slides URL HTTP/HTTPS

Add after the meeting.

Cancelled ON/OFF

Hides the meeting everywhere.

The next meeting appears on the homepage hero and as a live countdown on the Join page, calculated in Cincinnati time for everyone.

11.2 Recipes

Adding the next GBM

1. GBM Meetings → **“+”**.
2. Date, Time, Location, Topic → **“Publish”**.

Cancelling a GBM

1. Open it, turn on **Cancelled**, **“Publish”**. (Don’t delete; the record helps.)

Adding slides afterwards

1. Open the meeting, paste the share link into **Slides URL**, **“Publish”**.

11.3 Where Join applications go

The Join page's application form (name, email, year, major, interests, experience, "why Bearcast") is delivered to the directors' **private Slack channel** through the "Bearcast Interest Form" Slack app. It is not stored on the website or in Sanity.

> HANDLE APPLICATIONS WITH CARE
>
> Applications contain students' personal information. Keep the channel private and directors-only, reply from an official account, don't forward applications outside the board, and clear out old ones at the end of each recruiting cycle.

§ 12 — SITE SETTINGS

Site Settings

> *Site Settings is a single document (you can't create a second or delete it). Today, the website reads its Social Media tab. The other fields are stored for future use and don't yet change the site.*

12.1 The Social Media tab

Links shown as icons in every footer and the phone menu, as pills on the Join page, as the BTV "Subscribe on YouTube" button and the Sports "Follow on X" button.

FIELD	EXAMPLE
Instagram · TikTok · YouTube · X (Twitter)	`https://www.instagram.com/bearcastmedia/`
Sports X — shown only on the Sports page	`https://x.com/Bearcastmsports`
Discord (permanent invite) · Twitch · Spotify · Facebook · Threads · Linktree	`https://linktr.ee/BearcastMediaUC`

- Every link must start with `https://`.
- **While every field is empty**, the site uses a built-in list (Instagram, TikTok, YouTube, X, Sports X, Linktree).
- **Once any field is filled**, exactly the links here are shown — leave a field blank to hide that platform.
- Returning visitors may take up to 30 days (or until the next site update) to see a change, because settings are cached in their browser.

12.2 Other tabs

General (site name, tagline, founded year, contact email, homepage hero headline and subhead, footer copy), About / Mission and Recruiting (recruitment open, recruitment copy) are kept up to date for future features. Editing them is harmless but won't change the live site yet — ask the Web Director if you need copy changed now.

§ 13 — RULES

Things to Never Do

DON'T…	BECAUSE…	INSTEAD…
Delete people	Their articles lose their byline	Untick Is a Director
Delete published content	Deletion is permanent for you	Unpublish
Change a published slug	Shared links stop finding the story	Fix the headline only
Paste full YouTube URLs into the ID field	It only accepts the 11-character ID	Copy what comes after `v=`
Use 12-hour radio times	The schedule needs 24-hour times	`19:00`, not 7:00
Skip alt text	Screen-reader users and search engines lose the image	Describe what's in it
Publish half-finished "tests"	Published means public, and appears in search and the sitemap	Leave it as a draft
Put private information in any field	Everything published is publicly readable	Keep contact details out of Sanity
Try to add a sixth department	Departments are built into the website	Ask the Web Director
Invent new genre spellings	Filters and search split them apart	Reuse existing genres
Share your login	Your account publishes to the internet	Ask for an invite for them

§ 14 — TROUBLESHOOTING

When Something Looks Broken

“I published but the site hasn’t changed.”

Wait a minute — Sanity’s content network caches for about 60 seconds — then reload. Check the item says **Published**, not Edited. Social links can take longer for returning visitors (§12).

“Sanity says my time slot is invalid.”

Use 24-hour `HH:MM` with a leading zero (`06:00`), make start and end different, and don’t repeat the same day + start time.

“My YouTube ID won’t save.”

It must be exactly 11 characters — no `https://`, no `&t=30s`.

“An image won’t upload.”

Use a JPG, PNG or WebP file; if a very large phone photo stalls, export a smaller copy and try again. Check your connection.

“My link opens the wrong page” or “story not found”.

If the desk changed, the site forwards automatically. “Not found” means it was unpublished or the slug changed.

“The link preview in iMessage/Slack shows the generic Bearcast card.”

Make sure the story is published and has a cover image and excerpt. Apps cache previews — new links usually show the update; old ones may not.

“The Now On Air widget shows the wrong show.”

Check the show’s time slots (24-hour times, right day). The site uses the visitor’s local clock.

“The Team page order looks off.”

Check the Role / Title wording (§10.2) and the Department and Executive settings.

“A BTV video is missing.”

Wait 15 minutes after upload and make sure it’s Public. Without the API key only the newest 15 videos are listed.

“The page says Couldn’t load articles.”

The site couldn’t reach Sanity. Try again in a minute; if it persists, tell the Web Director — an automatic weekly check also watches for this.

If all else fails

Message the Web Director with the page address, what you expected, what you saw, and a screenshot. Nothing you can do in the Studio can break the website’s code.

§ 15 — REFERENCE

Glossary & Quick Reference

15.1 Glossary

Studio	bearcast.sanity.studio — where you edit.
Document	One item: an article, a review, a show, a person.
Draft	Saved but not public.
Publish / Unpublish	Make public / take down (kept as a draft).
Desk	The article setting that decides its page.
Slug	The story's piece of the web address.
Deck	The subtitle under a headline.
Excerpt	The short summary for cards, search and previews.
Hotspot	The point of an image that every crop keeps.
Alt text	A written description of an image.
Reference	A link from one document to another (an author to a person).
GBM	General Body Meeting.

15.2 Limits at a glance

FIELD	LIMIT	FIELD	LIMIT
Headlines / titles	180	Deck	300
Excerpts	500	Category	60
Tags	20 × 40	Alt text	300
Captions	500	Genre	40
Bio	1,500	Show / episode description	2,000
YouTube ID	exactly 11	Emoji	one emoji
Time slots	`HH:MM` 24 h	Colours	`#RRGGBB`
Score	0–10	Hosts	20
